

COMMERCIAL STARTING OR STARTING/CYCLE SERVICE

*Keep the Fleet Running with Starting
and Cycling Service Solutions*

MAGNAPOWER®

Many heavy-duty fleet truck or equipment applications require a high-powered battery to crank larger engines. An increasing amount of these applications also demand more accessory power from multiple electrical loads such as lights, communication, refrigeration, and other electrical-draining devices. This complete line of commercial-grade batteries is specially engineered to provide maximum power, performance, stamina, and durability to the industry's most demanding applications.

STARTING AND CYCLE SERVICE BATTERIES

Electrical Short Prevention System

Protects power-producing components from life-robbing electrical shorts

Rugged vibration resistant construction*

Reinforced internal design withstands heavy-duty use

Maintenance-free designs

Maximizes convenience, minimizes water loss for extended operation

Anchor-locked element and tight-packed construction

Resist demands of grueling daily use and off-road conditions

Commercial-tough polypropylene case and cover

Resist breakage to protect equipment and extend service life

ADDED FEATURES OF CYCLE SERVICE BATTERIES

Separator insulated fiberglass mats

Reinforce plate to better withstand demanding cycling service

High density oxide

Holds more reserve power for accessory equipment
