Leading edge manufacturing, using the industry's most modern computer-aided design equipment, has East Penn in the forefront of advanced battery manufacturing technology. As a result, the company produces the finest line of automotive power batteries in the industry. Every phase of battery manufacture is done at the A-4 plant.

The Deka Difference

East Penn is committed to implementing the highest environmental standards nationwide. The company recently launched its first environmental protection program. A comprehensive tracking and fast customer service.

ENVIRONMENTAL PROTECTION PROGRAM

The company's lead smelter and refinery has met the global environmental requirements of the semiconductor and aerospace industries. The company's lead smelter and refinery has met the global environmental requirements of the semiconductor and aerospace industries. The company's lead smelter and refinery has met the global environmental requirements of the semiconductor and aerospace industries.

East Penn owns and operates an innovative recycling infrastructure, and dozens of vertically integrated capabilities and other support facilities. New high-tech facilities and computer monitoring and control systems have enabled the company to continuously improve its environmental performance. The company's lead smelter and refinery is a leader in innovative recycling and has met global environmental requirements of the semiconductor and aerospace industries.

The company's lead smelter and refinery is a leader in innovative recycling and has met global environmental requirements of the semiconductor and aerospace industries.

Since 1946, East Penn has been producing high quality batteries and battery accessories for the automotive, commercial, marine, industrial, stationary, and specialty markets.

East Penn is a leading automaker for the automotive, commercial, marine, industrial, stationary, and specialty markets.

East Penn is a leading automaker for the automotive, commercial, marine, industrial, stationary, and specialty markets.

East Penn's quality manufacturing is recognized worldwide and has met the global requirements of ISO 9001 and ISO/TS 16949 certification standards. East Penn is also a leader in innovative recycling and has met global environmental requirements of the semiconductor and aerospace industries.

Staffed with a long-term management team, East Penn is an industry leader in producing high-class products and service to assure complete satisfaction, above and beyond the industry standard, to our partners and customers worldwide.

AUTOMOTIVE / LTV
One of the most complete lines available on the market today with virtually any size for any application.

INTERNATIONAL (EN)
Consists of the most popular EN (European Norm) sizes designed to match cover designs, dimensional configurations, hold-down requirements, and critical venting systems of original equipment.

ORDNANCE
Specifically designed to meet military specifications such as power and reliability requirements.

VINTAGE
Built tough to handle the demands of vintage and light commercial vehicle needs.

SCRUBBER / SWEEPER
Long-life performance with a complete line of 6- and 12-volt sizes.

COMMERCIAL
Rugged, heavy-duty power for demanding applications. One of the broadest selections in the industry.

GOLF CAR / EV
Superior performance with deep cycle power designed to meet the needs of the golf car/electric vehicle market.

ETX / POWER SPORTS
Premium quality, ready-to-install AGM technology ideal for all power sports vehicles.

LAWN & GARDEN
Durable batteries fit a variety of small engine applications and last longer in demanding outdoor use.

MARINE
Starting, deep cycle, and dual purpose batteries provide the right type of power for virtually any marine need.

GEL / AGM
The premium choice for power, nonspillable performance, and longer cycle life service.

The premium choice for power, non-spillable performance, and longer cycle life services.

SCRUBBER / SWEEPER
Long-life performance with a complete line of 6- and 12-volt sizes.

MOUNTED / OFFROAD
Reliability for a wide range of applications.

GOLDFIELD / HIGH PERFORMANCE
Premium performance with deep cycle power designed to meet the demands of off-road vehicles and Powersports applications.

4 TERMINAL / BOAT BATTERIES
Premium quality, ready-to-install AGM technology with up to 22" of power for marine applications.

ATV / UTV
Powerful, reliable performance for demanding applications.

LITHIUM ION
Premium quality, lightweight, and high-energy power for demanding applications.

VINTAGE / RETRO
Durable batteries designed to meet the demands of antique and classic vehicles.

HIGH PERFORMANCE / HIGH OUTPUT
Premium quality, ready-to-install AGM technology with up to 22" of power for marine applications.

4 TERMINAL / BOAT BATTERIES
Premium quality, ready-to-install AGM technology with up to 22" of power for marine applications.

GOLDFIELD / HIGH PERFORMANCE
Premium performance with deep cycle power designed to meet the demands of off-road vehicles and Powersports applications.

4 TERMINAL / BOAT BATTERIES
Premium quality, ready-to-install AGM technology with up to 22" of power for marine applications.
Leading edge manufacturing, using the industry’s most modern computer-controlled equipment, has East Penn make automotive batteries in advanced battery manufacturing technology. These batteries have been designed to deliver maximum performance in a variety of climates and environments. The company has specialized facilities for the production of batteries to meet the needs of every type of vehicle. This removes any need for the company to develop or manufacture extra capacity to meet increased production.

East Penn is committed to implementing the latest environmental standards, and the industry’s new green battery plants are designed to take into account all the latest ideas and practices. East Penn utilizes the latest in automation, robotics, and computer systems to provide the customer with the most efficient and highest-quality battery products. The company’s commitment to environmental stewardship includes the development and implementation of environmentally sound practices in all aspects of its operations. East Penn is a leader in the automotive and industrial battery markets, and its products are known for their quality and reliability. The company is committed to providing customers with the highest level of service and support, and it continues to invest in new technologies and processes to improve its products and processes.
Leading edge manufacturing: using the industry’s most modern computerized manufacturing equipment. Fast execution is not zero proofs, but is an advanced battery manufacturing technology that ensures a superior battery in every phase of battery manufacturing.

The Deka Difference

East Penn is committed to implementing the highest environmental standards to ensure a safe, sustainable future. Our state-of-the-art oxide manufacturing is designed to meet environmental and safety standards. Initially, the company was dedicated to recycling and innovative recycling processes, maintaining a steady increase in production.

Environmental Protection Program

East Penn has an extensive recycling infrastructure and maintains a state-of-the-art facility, a state-of-the-art oxide facility, an innovative recycling infrastructure, and has been committed to recycling and has met global environmental requirements of ISO 14001. East Penn has been consistently working to improve the environmental impact of its operations.

The company’s lead smelter and refinery is a state-of-the-art facility that meets the highest environmental standards. The company’s lead smelter and refinery is a state-of-the-art facility that meets the highest environmental standards.

Distribution Center

East Penn’s large, modern truck, trailer, and van fleet on the road continuously serves distributor and retailer accounts in all the company’s North American distribution centers. These centers are located throughout the United States and Canada where merchandise is needed. A fully equipped maintenance garage is located in all the company’s distribution centers. The company’s lead smelter and refinery is a state-of-the-art facility that meets the highest environmental standards.
