ULTIMATE AGM SERIES

Features

Enhanced Electrolyte Suspension System
- Absorbs more electrolyte, protects internal components
- Micro-porous glass separators prevent acid spills and terminal corrosion

Optimized component compression provides superior vibration resistance

Experience the East Penn Advantage

The A3™ Advanced-Cubed approach ensures the process behind the technology delivers critical quality at each stage of battery production. ULTIMATE batteries are supported by A3 manufacturing to optimize the life, power, and durability of the battery’s design and performance.
