

East Penn Manufacturing Co. is pleased to announce

## Grae Buck qualifies for the 2024 MLF Bass Pro Tour.

Grae Buck powered through the 2023 MLF season with Deka Marine Master AGM batteries designed for the most demanding use of heavy duty deep cycle service.

Grae Buck, an up-and-coming professional bass angler, has guaranteed his place in the prestigious Bass Pro Tour 2024 series. He earned his spot after an impressive run at the Major League Fishing (MLF) Invationals series in 2023. This will be his first season competing in the series. Grae also snagged 6th overall in the Angler of the Year point standing for the Tackle Warehouse Invitational Series.

Throughout the 2023 season, Grae has powered his Bass Cat Cougar boat with Deka Marine Master AGM batteries made for Heavy Duty Deep Cycle use.

“One of the questions I get asked the most is what batteries I’m using. I’m a Deka guy,” said Grae. “This season I used the Marine Master AGM batteries, and they have stood up to the demands of a long day on the water. I run everything off these batteries, from my trolling motor, running lights and all of my electronics, they have plenty of power and haven’t let me down.”

Grae has established himself as a top professional bass angler on the MLF Pro Circuit with a record of 12th place in 2022 out of 158 anglers. In 2020, he finished 3rd for the MLF Angler of the Year in point standings and 7th in the MLF Title Championship. The 2024 Bass Pro Tour will bring a new challenge for Grae, as he looks forward to the opportunity to compete across the country, with Deka Marine Master batteries on board to power the journey!
