

East Penn Manufacturing Co. is pleased to announce

## **Deka Marine Master® is the Official Battery Brand of Grae Buck Fishing.**

Grae Buck confidently launches into a new 2023 Major League Fishing season with the power of Deka Marine Master AGM batteries designed for the most demanding use of heavy duty deep cycle service.

Grae Buck, one of the most promising up-and-coming Pro Circuit professional bass anglers, will be competing in the 2023 Major League Fishing Invitationals and the Northern Toyota Series. For the entire season, he will be powering his Bass Cat Cougar Boat with Deka Marine Master AGM batteries made for Heavy Duty Deep Cycle use.

*"I am confident that the high quality of Deka Marine Master batteries will easily power me through a demanding season with long days that start way before the sun goes up and end long after it comes down," said Grae. "I am excited to prove that the AGM batteries I will be using will serve me well and be the smart choice for anyone from the professional angler to the weekend warrior to families just enjoying their time on the water together. I believe the affordability, safety, and sustainability of this brand of battery product is second to none."*

As someone who loves the outdoors and has a college degree in Environmental Resource Management, Grae appreciates the fact that the technology behind Deka Marine Master batteries is highly recyclable. In fact, the lead battery design has an industry recycling rate of over 99%, which is a higher rate than items like aluminum cans, newspapers, and glass bottles.

*"I recently toured the actual facility where these batteries are made and recycled. I was blown away by how these old batteries can be completely reused to make new ones. I think everyone should know more about supporting products, especially batteries, that can be completely recycled in this fashion,"*

*stated Grae. "It also made me feel good to know that as I walked through the manufacturing plants in Pennsylvania, that these batteries were made right here in America."*

Grae has established himself as a top professional angler on the MLF Pro Circuit with a record of 12th place in 2022 out of 158 anglers. In 2020, he finished 3rd for the MLF Angler of the Year Pro Circuit in point standings and 7th in the MLF Title Championship.
