

Your Full Service Solution Provider

engineer - furnish - install

Count on us as your Full Service Solution Provider.

What that means for you

TURNKEY EF&I SOLUTIONS

- ▶ Design and engineer your system for the utmost in reliability and lowest total cost of ownership
- ▶ Key service and distribution centers throughout North America
- ▶ Integration of all components at our facilities to minimize the delivery and installation process
- ▶ No-hassle warranty
- ▶ Professional high quality installation services and batteries ensures the highest quality system
- ▶ Complete facility build-outs: DC Power Systems, UPS Systems, Infrastructure and cabling
- ▶ Project management, installation management, and multi-site scheduling
- ▶ Logistical support, labor, material procurement, and site delivery
- ▶ Facility audits
- ▶ Training offered for maintenance, safety, design, sizing, and application

POWER SYSTEM MAINTENANCE

- ▶ Create a custom scheduled maintenance program to maximize battery performance
- ▶ Monthly, quarterly, semi-annual or annual inspections, performed to strict IEEE Standards
- ▶ Proactive trending analysis of ohmic readings to monitor battery and avoid surprises
- ▶ Complete maintenance of DC power systems including all components, cabling sizing, load profiles and redundancy

Backed by East Penn, operating the largest single site lead battery factory in the world.

BATTERY CAPACITY TESTING

- ▶ Battery capacity testing based on strict IEEE standards to determine your battery systems' health
- ▶ Experience to provide a thorough and safe capacity test
- ▶ Temporary battery and power plant systems available
- ▶ Thermographic imaging available for a more detailed analysis
- ▶ Detailed report including graphic analysis of the results plus any recommendations or actions required

REMOVAL AND RECYCLING

- ▶ Complete tear down and removal of all types of batteries and power systems including the proper paperwork for EPA approved recycling of your lead batteries.
- ▶ Backed by the environmental commitment of East Penn and their lead battery recycling success story
