

Power
for the road ahead.

The complete line
of batteries to power
today's vehicles into tomorrow.

It's time to take charge of your customer's needs.

Navigating the morning commute. Dropping kids off at school. Going on a grocery run.

Your customers rely on their vehicles to keep their daily lives moving. However, hitting the road has gotten a lot more complicated. Today's drivers are behind the wheel of vehicles jam packed with amenities, electronics, sensors, navigation and start-stop systems – all demanding more and more power from batteries. Batteries that fail to keep up will grind a busy day to a halt.

To keep your customers happy and comfortably cruising, you need the right kind of battery technology that will meet their multi-faceted service requirements.

Help your customers find the power they need with Deka's complete line of battery options.

Our robust line of products are strategically designed to provide sensible power for the many kinds of vehicles on the road today, including the 12-volt systems in EVs. From our high-performance future-focused Intimidator AGM, to the dependability of the Deka Ultimate, Gold, and Standard, you'll have your customers covered and powered to go boldly down the road ahead.

Power
for the road ahead.

“Good enough” just isn’t good enough anymore.

DEKA INTIMIDATOR AGM BATTERIES

Future-Focused Technology

Deka Intimidator AGM batteries provide the confident power that supports the advancing technology of today's vehicles. With a highly-efficient AGM design, you can better protect the battery's performance over time while providing more power for the vehicle's electronics.

- Premium maintenance-free power delivers optimized starting and cycling service
- Spillproof design provides added safety for user and protection for sophisticated electronic equipment
- Intimidating durability withstands demanding conditions like start and stop driving
- Faster, more efficient recharging and better performance in colder temperatures

DEKA ULTIMATE, GOLD AND STANDARD SERIES

Trusted, Dependable Deka Power

The Deka Ultimate, Gold, and Standard battery series feature our exclusive Optimized Power Plate technology delivering high quality and reliable performance for vehicles on the road today. Each battery line is built with the power options needed to get engines of all sizes started and running with the performance and dependability you've come to expect from the Deka name.

- Premium starting and reserve power
- Fortified posts, straps, and welds resist vibration
- Flush cover, maintenance-free design enhances overall battery performance, safety, and convenience

DEKA ULTIMATE EFB BATTERY SERIES

Sophisticated and Practical Power

As vehicle electrification has skyrocketed, so has the power demanded of batteries. Start-Stop system integration and other technological advancements require more cycling and recharging than standard battery designs. Deka Ultimate Enhanced Flooded Batteries (EFB) provide a flooded premium, cost-competitive option to meet the growing electrical demands of today's vehicles.

- Carbon Loaded Active Material Additive increases charge acceptance which decreases the risk of a battery that's not properly charged
- Glass Fiber Coated Separators provides greater durability in frequent cycling applications to extend service life
- Premier quality flooded design

Please note: If a vehicle currently has an AGM battery, then it's important that it's replaced with an AGM battery to ensure that the vehicle's battery management system works properly and to maintain optimal battery health.

DEKA INTIMIDATOR WITH EHP

Essential Batteries for the Electrification of Vehicles

Our Electric & Hybrid Performance (EHP) batteries are specially designed and uniquely capable of delivering the power needed by EVs, HEV, Start-Stop systems and other auxiliary services for critical vehicle function. These batteries are designed to provide safe, reliable power in any location of the vehicle.

- Superior electrolyte in glass mat retention maximizes long-term capacity
- Individual cell venting
- Ultra-dependability from enhanced valve-regulation system
- Spillproof durability critical for the variability and safety of installation locations required

FILL, FORM, FINISH, AND DISTRIBUTION FACILITY

Operating the largest, single-site battery manufacturing facility in the world with on-site battery recycling in Lyon Station, PA, and distribution facilities across the country.

- Five large battery manufacturing plants
- Five distribution centers across the U.S.
- Two Finishing Distribution Centers
- Extensive warehouse network throughout U.S. and Canada
- Company-owned fleet
- Oxide production & lead refinery
- Plastic refinery and molding
- Acid reclamation and wastewater treatment
- Machine tooling & maintenance
- Construction & electrical
- Continuous Improvement, Technical and Innovation Centers
