time for more optimized

The Intimidator AGM Deep Cycle Series provides an ideal solution for heavy marine house power, renewable energy powered equipment, portable power needs, golf cars and other types of electric vehicles.

Completely spillproof and maintenance-free AGM technology eliminates watering and unnecessary maintenance. Intimidator Deep Cycle batteries spend less time on the charger and more time in service by actually **recharging faster** than conventional batteries.

A **high deep discharge abuse tolerance** provides added resiliency for dependable deep cycle service.

Intimidator® AGM Solutions for Intimidating Battery Needs

Intimidator deep cycle batteries can be substituted in virtually any flooded lead-acid battery deep cycle application (in conjunction with voltage charging), as well as applications where traditional flooded batteries cannot be used. Because of their unique features and benefits, Intimidator deep cycle batteries are particularly well suited for:

COMMON DEEP CYCLE, DEEP DISCHARGE APPLICATIONS

- Marine Trolling Electronics Sailboats Electric Vehicles Wheelchairs Golf Cars
- Portable Power
 Floor Scrubbers
 Personnel Carriers
 Marine & RV House Power

STANDBY AND EMERGENCY BACKUP APPLICATIONS

- UPS (Uninterrupted Power Systems)
 Cable TV
 Emergency Lighting
 Computer Backup
- Solar Power Telephone Switching Village Power

INTIMIDATOR AGM DEEP CYCLE SERIES HAS EXTRA PROTECTION AGAINST DEEP DISCHARGING

Ultra-deep discharging is what causes life-shortening plate shedding and accelerated positive grid corrosion, which can destroy a battery. Intimidator deep cycle batteries are designed to use the optimized amount of acid (no more, no less). This means that the power in the acid is used before the power in the plates. This design, along with the enhanced durability in the glass mat and plate construction, protects the internal components from ultra-deep discharges.

ENHANCED ELECTROLYTE SUSPENSION SYSTEM

- Absorbs more electrolyte, protects internal components
- Micro-porous glass separators prevent acid spills and terminal corrosion
