

Proper Battery Recycling CAN SAVE LIVES!

- Lead Batteries and Lithium Ion Batteries May Look Similar But They **ARE NOT!**
- Trying to recycle a Lithium Battery like a Lead Battery is **EXTREMELY DANGEROUS**
- **YOU HAVE THE POWER** to help protect people, save lives, and keep our critical recycling operations safe.

MAKE THE EFFORT

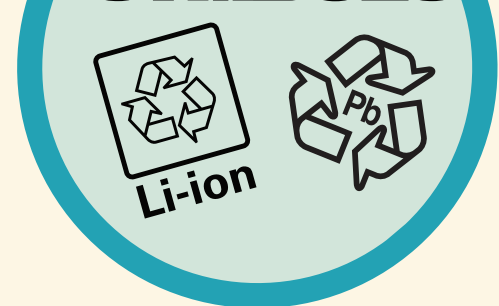

Be sure YOU know what type of battery it is before putting it on the recycling skid.
LIVES DEPEND ON IT!

CHECK THE WEIGHT

If it feels much lighter than a traditional lead battery, it is probably **NOT A LEAD BATTERY**. Take the next step to properly check it out.

LOOK FOR MARKINGS & SYMBOLS

- Read all markings and labels.
- Check for any symbols like Pb (lead) or (Li) Lithium.
- Research the manufacturer.
