SAFETY DATA SHEET

1. Identification

Product identifier  Lithium Iron Phosphate (LiFEP04) Battery or Cell
Other means of identification  None.
Recommended use  Battery for electric lift-truck, mobility & package handling equipment
Recommended restrictions  None known.

Manufacturer/Importer/Supplier/Distributor information

Manufacturer  Navitas Systems
Address  5949 Jackson Rd, Ann Arbor, MI 48103
Supplier  Navitas Systems
Address  5949 Jackson Rd, Ann Arbor, MI 48103
Telephone number  (855) 739-7697
Contact person  Navitas Systems EHS Department
Emergency telephone number  USA/Canada: CHEMTREC (800) 424-9300, Outside USA 1 (703) 527-3887
E-mail  dekareadypower@navitassys.com

2. Hazard(s) identification

Physical hazards  Not classified.
Health hazards
Skin corrosion/irritation  Category 2
Serious eye damage/eye irritation  Category 1
Sensitization, skin  Category 1
Specific target organ toxicity, repeated exposure  Category 1 (bone, teeth)

Environmental hazards  Hazardous to the aquatic environment, acute hazard  Category 1
Hazardous to the aquatic environment, long-term hazard  Category 3

OSHA defined hazards  Not classified.

Label elements

Signal word  Danger
Hazard statement  The materials contained in this product may only represent a hazard if the integrity of the cell or battery is compromised; physically, thermally, or electrically abused. The below are the hazards anticipated under those conditions:
Causes skin irritation. May cause an allergic skin reaction. Causes serious eye damage. Causes damage to organs (bone, teeth) through prolonged or repeated exposure. Very toxic to aquatic life. Harmful to aquatic life with long lasting effects.

Precautionary statement
Prevention  Keep out of reach of children. Do not breathe dust. Do not eat, drink or smoke when using this product. Wear protective gloves/protective clothing/eye protection/face protection. Wash thoroughly after handling. Contaminated work clothing must not be allowed out of the workplace. Avoid release to the environment.

Response  If on skin: Wash with plenty of water. If skin irritation or rash occurs: Get medical advice/attention. Take off contaminated clothing and wash it before reuse. If in eyes: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a poison center/doctor. Get medical advice/attention if you feel unwell. Collect spillage.
Storage
Store as indicated in Section 7.

Disposal
Dispose of contents/container in accordance with local/regional/national/international regulations.

Hazard(s) not otherwise classified (HNOC)
None known.

Supplemental information
Under normal conditions of processing and use, exposure to the chemical constituents in this product is unlikely. The chemicals are contained in a sealed steel housing. Risk of exposure occurs only if the battery is mechanically, thermally or electrically abused. If this occurs, exposure to the electrolyte solution contained within can occur by Inhalation, Ingestion, eye contact and skin contact.

Additional Notes: CAUTION: Do not dispose in fire, mix with other battery types, charge above specified rate, connect improperly, or short circuit, which may result in overheating, explosion or leakage of cell contents. Do not open or disassemble. Keep away from heat/sparks/open flames/hot surfaces. - No smoking. Do not puncture, deform, incinerate or heat above 85°C (185°F).

</table>

All concentrations are in percent by weight unless ingredient is a gas. Gas concentrations are in percent by volume.

This product is an article.

Composition comments
The manufacturer has claimed the exact percentage as trade secret under the OSHA Hazard Communication Standard.

4. First-aid measures

Inhalation
Exposure to contents of an open or damaged battery: Move to fresh air. Get medical attention if any discomfort continues.

Skin contact
Exposure to contents of an open or damaged battery: Wash off immediately with plenty of water for at least 15 minutes. If skin irritation or rash occurs: Get medical advice/attention.

Eye contact
Exposure to contents of an open or damaged battery: Immediately flush with plenty of water for at least 15 minutes. If easy to do, remove contact lenses. Get medical attention immediately.

Ingestion
Exposure to contents of an open or damaged battery: Rinse mouth thoroughly. Get medical attention if any discomfort occurs.

Most important symptoms/effects, acute and delayed
Exposure to contents of an open or damaged battery: Causes severe eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Causes skin irritation. May cause redness and pain. May cause allergic skin reaction. Rash. Dermatitis.

Indication of immediate medical attention and special treatment needed
Treat symptomatically.

General information
Show this safety data sheet to the doctor in attendance.

5. Fire-fighting measures

Suitable extinguishing media
Dry chemical powder.

SPECIFIC RECOMMENDATIONS. Class D fire extinguisher.
Unsuitable extinguishing media
Do not use a solid water stream as it may scatter and spread fire.

Specific hazards arising from the chemical
Containers can burst violently when heated, due to excess pressure build-up. Fire may produce irritating, corrosive and/or toxic gases. During water application, caution is advised as burning pieces of flammable particles may be ejected from the fire. Carbon oxides (COx). Hydrogen Fluoride.

Special protective equipment and precautions for firefighters
Wear self-contained breathing apparatus and protective clothing.

Fire fighting equipment/instructions
Use standard firefighting procedures and consider the hazards of other involved materials.

Specific methods
In the event of fire do not breathe fumes. Copious amounts of cold water or water-based foam may be used to cool burning cells or batteries.

General fire hazards
The product is not flammable. Will burn if involved in a fire.

6. Accidental release measures

Personal precautions, protective equipment and emergency procedures
Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. Do not touch damaged containers or spilled material unless wearing appropriate protective clothing. Avoid breathing dust/fume/vapors. Leak from a damaged or opened battery: Avoid contact with skin and eyes.

Methods and materials for containment and cleaning up
Leak from a damaged or opened battery: Wipe up with absorbent material (e.g. cloth, fleece). Place in a designated labeled waste container, dispose as hazardous waste.

Environmental precautions
Do not contaminate water sources or sewer.

7. Handling and storage

Precautions for safe handling
Batteries are designed to be recharged. However, improperly charging a cell or battery may cause the product to flame or leak. Use only approved chargers and procedures. Do not allow conductive material to touch the battery terminals. A dangerous short-circuit may occur and cause battery failure and fire. CAUTION: Do not dispose in fire, mix with other battery types, charge above specified rate, connect improperly, or short circuit, which may result in overheating, explosion or leakage of cell contents. Do not open, disassemble, crush or burn battery. Do not expose battery to extreme heat or fire. Extended short-circuiting creates high temperatures in the cell. High temperatures can cause burns in skin or cause the cell to fume. Avoid reversing the battery polarity within the battery assembly. To do so may cause the cell to flame or leak. Observe good industrial hygiene practices. Wash hands thoroughly after handling.

Conditions for safe storage, including any incompatibilities
Keep out of reach of children. Batteries should be separated from other materials and stored in a non-combustible, well ventilated structure with sufficient clearance between walls and battery stacks. Do not place batteries near heating equipment. Store in a cool, dry place. Do not store batteries in a manner that allows terminals to short circuit. Store away from incompatible materials (See Section 10). Do not store batteries above 60°C (140°F) or below -20°C (-4°F). Store batteries in a cool (below 25°C (77°F)), dry area that is subject to little temperature change. Battery exposure to temperatures in excess of 130°C (266°F) will result in the battery venting flammable liquid and gases.

### Biological limit values
No biological exposure limits noted for the ingredient(s).

### Appropriate engineering controls
Under conditions of normal use, batteries do not emit hazardous or regulated substances. No engineering controls are required for handling batteries that have not been damaged.

Leak from a damaged or opened battery: Good general ventilation should be used. Ventilation rates should be matched to conditions. If applicable, use process enclosures, local exhaust ventilation, or other engineering controls to maintain airborne levels below recommended exposure limits. If exposure limits have not been established, maintain airborne levels to an acceptable level. If engineering measures are not sufficient to maintain concentrations of dust particulates below the Occupational Exposure Limit (OEL), suitable respiratory protection must be worn. Provide eyewash station and safety shower.

### Individual protection measures, such as personal protective equipment

#### Eye/face protection
Wear safety glasses with side shields (or goggles).

#### Skin protection

- **Hand protection**
  Wear appropriate chemical resistant gloves. Suitable gloves can be recommended by the glove supplier.

- **Other**
  Wear appropriate chemical resistant clothing. Use of an impervious apron is recommended.
Respiratory protection

None under normal conditions.

Leak from a damaged or opened battery: Use a NIOSH/MSHA approved respirator if there is a risk of exposure to dust/fume at levels exceeding the exposure limits. In the event of a fire, wear SCBA and thermally protective outer garments.

Thermal hazards

Wear appropriate thermal protective clothing, when necessary.

General hygiene considerations

Always observe good personal hygiene measures, such as washing after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Contaminated work clothing should not be allowed out of the workplace.

9. Physical and chemical properties

Appearance

Physical state
Solid.

Form
Battery.

Color
Not available.

Odor
Not available.

Odor threshold
Not available.

pH
Not Known.

Melting point/freezing point
Not available.

Initial boiling point and boiling range
Do not puncture, deform, incinerate or heat above 85 C or (185 F)

Flash point
Do not puncture, deform, incinerate or heat above 85 C or (185 F)

Evaporation rate
Not available.

Flammability (solid, gas)
Not available.

Upper/lower flammability or explosive limits

Flammability limit - lower (%)
Not available.

Flammability limit - upper (%)
Not available.

Explosive limit - lower (%)
Not available.

Explosive limit - upper (%)
Not available.

Vapor pressure
Not available.

Vapor density
Not available.

Relative density
Not available.

Solubility(ies)

Solubility (water)
Not available.

Partition coefficient (n-octanol/water)
Not available.

Auto-ignition temperature
Not available.

Decomposition temperature
Not available.

Viscosity
Not available.

Other information

Explosive properties
Not explosive.

Oxidizing properties
Not oxidizing.

10. Stability and reactivity

Reactivity

The product is non-reactive under normal conditions of use, storage and transport.

Damaged non-discharged batteries contain elemental Lithium that is water reactive. This reaction gives off heat and hydrogen gas.

Chemical stability

The product is stable under normal conditions of use, storage and transport.

Possibility of hazardous reactions

No dangerous reaction known under conditions of normal use.
Do not allow conductive material to touch the battery terminals. A dangerous short-circuit may occur and cause battery failure and fire. Do not puncture, deform, incinerate or heat above 85°C or (185°F). Heat, sparks, flames, elevated temperatures.

It is not recommended that this product be stored above 60°C (140°F).

**Incompatible materials**
- Do not immerse in seawater or other high conductivity liquids.

**Hazardous decomposition products**
- Irritating and/or toxic fumes and gases may be emitted upon the products decomposition. Carbon oxides. Hydrogen fluoride.

### 11. Toxicological information

#### Information on likely routes of exposure

**Inhalation**
- No inhalation hazard under normal conditions. Exposure to contents of an open or damaged battery: Dust may irritate respiratory system. Prolonged inhalation may be harmful.

**Skin contact**
- Exposure to contents of an open or damaged battery: Causes skin irritation. May cause an allergic skin reaction.

**Eye contact**
- Under normal conditions of intended use, this product does not pose an eye hazard. In the event that cell or battery is damaged, open, or leaking – irritation with injury resulting in permanent impairment of vision and chemical burn may occur. Permanent eye damage or blindness could result.

**Ingestion**
- Exposure to contents of an open or damaged battery: May be harmful if swallowed. May cause discomfort if swallowed. However, ingestion is not likely to be a primary route of occupational exposure.

**Symptoms related to the physical, chemical and toxicological characteristics**
- Exposure to contents of an open or damaged battery: Causes serious eye damage. Symptoms may include stinging, tearing, redness, swelling, and blurred vision. Permanent eye damage including blindness could result. Skin irritation. May cause redness and pain. May cause an allergic skin reaction. Dermatitis. Rash.

#### Information on toxicological effects

**Acute toxicity**
- Not known.

**NTP Report on Carcinogens**
- Not listed.

- Not listed.

**Reproductive toxicity**
- This product is not expected to cause reproductive or developmental effects.

**Specific target organ toxicity - single exposure**
- Not classified.
Specific target organ toxicity - repeated exposure

Exposure to contents of an open or damaged battery: Causes damage to organs (bone, teeth) through prolonged or repeated exposure.

Lithium hexafluorophosphate (CAS# 21324-40-3): Causes damage to organs (bone, teeth) through prolonged or repeated exposure.

Aspiration hazard

Not an aspiration hazard.

Chronic effects

Prolonged inhalation may be harmful. Causes damage to organs through prolonged or repeated exposure.

12. Ecological information

Ecotoxicity

No ecological impacts expected under normal use conditions. The hazards listed below are only anticipated when the integrity of a battery casing is compromised:

Very toxic to aquatic life. Harmful to aquatic life with long lasting effects.

Persistence and degradability

No data is available on the degradability of any ingredients in the mixture.

Bioaccumulative potential

| Partition coefficient n-octanol / water (log Kow) | 1.23 |
| n-propyl acetate (CAS 109-60-4) | |

Mobility in soil

No data available.

Other adverse effects

No other adverse environmental effects (e.g. ozone depletion, photochemical ozone creation potential, endocrine disruption, global warming potential) are expected from this component.

13. Disposal considerations

Disposal instructions

Recycle the batteries, as the primary disposal method. Collect and reclaim or dispose in sealed containers at licensed waste disposal site.

Local disposal regulations

Dispose in accordance with all applicable regulations.

Hazardous waste code

The waste code should be assigned in discussion between the user, the producer and the waste disposal company.

Waste from residues / unused products

Dispose of in accordance with local regulations. This product and its container must be disposed of in a safe manner.

Contaminated packaging

If contaminated by a leaking or damaged battery, empty containers should be taken to an approved waste handling site for recycling or disposal.

14. Transport information
